Roofing + Heating Torch Set P1

P1 – the lightweight professional champion

The P1 Set includes a heavy-duty handle with automatic economy control and with preset ignition flame that complies with BG regulation D 34 §11 paragraph 16, a 600 mm long angled torch tube with a 60 mm diameter torch head made of stainless steel, a screw-on footstand, a 5m rubber high pressure hose up to 30 bar, dimensions: 4x4mm, completely assembled with connections and a propane regulator with multiple connections for 5-33kg cylinders, adjusted to 4 bar with integrated hose failure safety device.

105 kW!

The P1 has 105.5KW (380.070KJ/h) and consumes 8.2kg/h of propane gas.

Weighing in at only 850g the torch in the P1 set is in the lightweight class of propane heating torches and is easy on the back and arm joints even when working for prolonged periods. Far less energy is required to move your arms and hold the torch. Combined

with an ergonomic grip made of brushwood (common beech) the P1 torch is a lightweight professional tool but heavy duty and low maintenance at the same time – perfect for everyday use on construction sites.

Specifications

Gas consumption at 4 bar:	8.2 kg/h
Output:	105.5 kw 380,070 KJ/h
Hose length:	5 m
Total weight of set:	2.87 kg
